DETAILED ACTION

1. Claims 1-7 are pending in this application and have been examined.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 contains the phrase: "...arranged to be difficult for a pirate to copy..." The meaning of the phrase is unclear as it is a relative term. Claims 2-7 are dependent on claim 1 and are thereby rejected on the same basis as that claim.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-7 are, rejected under 35 U.S.C. 103(a) as being obvious in view of Hurtado et al., US 6,611,812, and Kajiyama et al. US 6,108,296.

Art Unit: 2137

As for claims 1 and 6, Hurtado teaches a credit or debit protected optical disk for use with a CD-ROM drive (fig. 18, item 1802) to provide for payment over a network to a seller of supplies or services (abstract) comprising:

- (a) an optical disk including a preformed identification signature that is impressed and arranged to be difficult for a pirate to copy (col. 10 lines 48-57, fig. 18 item 1802); and
- (b) a RAM portion in which user-specific encrypted information is written (col. 10 lines 48-57) which makes the optical disk unique for a specific user (col. 10 lines 48-57) and in combination with the preformed identification signature provides a user-personalized secure signature that permits a user to communicate over a network to make payment for ordered products and services with a high degree of assurance that the information on the disk is secure from piracy (col. 12 lines 25-42).

Hurtado does not teach a hybrid optical disk having preformed identification information is stored in ROM. However Kajiyama et al. does teach this feature (fig. 10, lines 45-60. Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate this feature into the disk of Hurtado. Motive to make this combination is found in Kajiyama col. 1 lines 55-60 where the advantage of such an arrangement in disk anti-piracy schemes is noted.

As for claim 2, Hurtado teaches user personalized signature data that includes pre-payment information that permits prepayment in whole or in part (col. 10 lines 48-56).

Art Unit: 2137

As for claim 3, Hurtado teaches a disk that is shaped to be useable by a conventional optical disk drive (fig. 18 item 1802)

As for claims 4 and 5, Hurtado teaches a RAM portion (hence locally provided) that includes a series of interactive questions that solicit answers from the user to verify the authenticity of the user (col. 86 lines 25-35).

As for claim 7, it represents the method of use of the disk of claim 1 and is thereby rejected on the same basis as claim 1.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following US Patent documents teach systems of copy control and rights management in similar to that of the applicant.

Richardson, III	5,490,216
Lang	5,065,429
DeMont	5,982,889

Wyman 5,745,879
